Features and Benefits Include:

1. Quality Design and Construction
   - All stainless steel.
   - R-12 insulation, less than 1 deg. F / hr. heat loss.
   - Flexible thermoplastic jacket that will not dent or corrode.
   - Stainless steel dip tubes.

2. Easy Installation
   - All connections are on top on the standard units. Connecting to a high efficiency wall-mount boiler or instantaneous water heater is about as easy as it gets.
   - Units are provided with two separate connections for heat source supply and return, and an aquastat. The result is excellent temperature control and no guesswork. These two connections are hydraulically decoupled from cold and hot. High hot water draw rates will not effect the circulator/ control performance.
   - Drain valve and T+P valve are factory installed.
   - Honeywell L4080B control is standard.

3. Residential and Commercial
   - Models available with 30, 40, 60, 80, and 115 gallon tanks.
   - Banking together 80 and 115 gallon units for applications with high water heating demands.
