MULTI-ENERGY TANKS

Heat-flo's industry-leading Multi-Energy Tanks are ideal for a variety of residential and commercial solar hot water and heating applications. Each Multi Energy Tank is available with or without a heat exchanger, in 60, 80 or 115-gallon capacities. Tanks with heat exchangers are available with one or two coil configurations.

Our versatile Heat-flo Multi-Energy Tanks are configured with heat exchanger coils and can be connected directly to solar collectors to maximize efficiency. Units without coils can be connected to external brazed plate heat exchangers. All units are available with or without built-in electric backup.

Units equipped with electric backup are provided with a heating element, thermostat, and controls that can heat the tank if solar heat is not available, ensuring consistent hot water performance. Additionally, all electric backup units are also equipped with a high quality low watt density 277 volt AC, 4500 watt element. All units are equipped with a removable thermal well to accept a solar control thermostat or thermistor.

FEATURES AND BENEFITS INCLUDE:
